Bootstrap, Reactjs, Github,
Deployment

Other Software:

Microsoft Visual Code
Adobe Illustrator
Adobe Photoshop
Adobe AfterEffects
SAi Flexi-Sign

Full-Stack Web Developer leveraging 5+ years of experience in graphic design to build a unique user experience on web applications. Recently earned a certificate in Full Stack Web Development from the University of Pennsylvania. Versatile problem solver with strong organizational skills, whose determination and patience leads to impactful results. Enjoys creating applications within a team setting that have strong UI's that are easy-to-use and intuitive. Looking forward to joining a team where I will contribute strengths in creativity, branding, and communication from my graphic design experience.

Experience

2014 - **Graphic Designer**

Current **Signarama**

- Responsible for daily design and manufacturing in a small, high-end sign graphics business.
- Developed +2000 graphic design projects (vehicle graphics, business cards, channel letters, yard signs, and more)
- Effectively communicates with customers on projects to meet their expectations while also suggesting ways to make the final product more impactful
- Developed better shop practices that increased productivity and decreased waste on shop materials.

Education

2019 **Full-Stack Web Development Certification**

The University of Pennsylvania - LPS Bootcamp

2009 - **Bachelors of Arts in Art - Focus in New Media**

The Pennsylvania State University

Recent Web Project

2019 **Co-Developer: The Sarge Application** - React-based web application with a mongoDB database that allows powerlifters to easily track new personal records.

- Utilizing react-bootstrap for front-end development
- Wiring the front-end to the back-end routes for database communication.
